Professional Summary

MSc Data Science student at the University of Glasgow with a strong foundation in **AI, data engineering, analytics, and software development**, built upon a B.Tech in Computer Science and Engineering (Big Data Analytics) with a **CGPA of 9.68/10**.

Experienced in building **AI-powered applications, dashboards, ETL pipelines, and data-driven systems** across healthcare, education, finance, and operational domains. Strong skills in **Python, SQL, machine learning, NLP, Power BI, and data engineering**, with the ability to translate business problems into practical technical solutions.

Co-authored **peer-reviewed IEEE publications** and built end-to-end systems including AI applications, databases, reporting tools, and stakeholder-facing dashboards. Focused on delivering **real-world impact through applied AI and automation**.

Education

University of Glasgow

MSc Data Science

Glasgow, UK

Sep 2025 – Present

SRM Institute of Science and Technology

B.Tech Computer Science and Engineering (Big Data Analytics)

India

2021 – 2025

CGPA: 9.68/10

Efrei Paris

Student Exchange Programme – Data Science

Paris, France

Sep 2024 – Jan 2025

Experience

KatalyzU

Co-Founder | AI & Data Solutions Lead

Jan 2024 – Present

Remote

- Build and deliver **AI-powered applications, dashboards, and data systems** for real business use cases.
- Developed a **credit management platform** for Skanda Enterprises supporting customer accounts and operational reporting.
- Built an **AI-assisted learning platform** for Chartered Accountancy students with personalised learning workflows.
- Contributed to a **fuel depot management system** for an international client supporting operational monitoring and structured data handling.
- Designed and implemented **ETL pipelines** covering data collection, cleaning, validation, transformation, and reporting.

SRM Institute of Science and Technology

Data Scientist & Statistician

Apr 2023 – Jan 2024

Chennai, India

- Supported healthcare analytics projects involving **data cleaning, validation, statistical analysis, and reporting**.
- Designed surveys and analysed structured datasets to generate **evidence-based insights**.
- Delivered findings to academic and healthcare stakeholders in clear, actionable formats.
- Maintained **data quality, integrity, and consistency** across research workflows.

IEEE India Council

Research Mentee

Aug 2024 – Dec 2024

Remote

- Co-authored **peer-reviewed IEEE research papers** in AI and healthcare analytics.
- Worked in an industry-academia mentorship programme focused on applied research.
- Developed skills in **technical writing, research communication, and problem solving**.

Efrei Paris

Student Exchange Programme (Data Science)

Sep 2024 – Jan 2025
Paris, France

- Completed advanced coursework in **data science, statistics, and machine learning**.
- Worked in an international, multidisciplinary academic environment.
- Strengthened applied skills in **data-driven problem solving and analysis**.

Projects

Real-Time Operations Command Center (Power BI)

2025

Business Intelligence Project

- Built a **Power BI operational dashboard** for performance monitoring and decision support.
- Implemented **Power Query, DAX measures, KPI tracking, SLA monitoring, and anomaly detection**.
- Designed a **command-centre style reporting system** for business operations visibility.
- Simulated near real-time reporting using automated refresh workflows and structured data pipelines.

AI Learning Platform for CA Students

2025

AI Product Development

- Developed an **AI-powered learning platform** using LLM-based content assistance.
- Designed personalised learning workflows to improve student engagement and retention.
- Built user-facing interfaces for structured knowledge delivery and interaction.
- Aligned system design with real educational requirements and stakeholder input.

Credit Management Platform (Skanda Enterprises)

2024–2025

Business Application

- Built a **database-driven credit management system** for customer account tracking.
- Implemented reporting workflows for financial monitoring and decision support.
- Designed SQL-based data structures for scalable business operations.
- Delivered end-to-end solution based on stakeholder requirements.

Drug–Drug Interaction Analysis (GNN)

2025

Healthcare AI Research

- Developed **graph neural network models** for drug interaction prediction.
- Combined structured healthcare data with NLP sentiment analysis.
- Applied predictive modelling for adverse drug reaction identification.
- Published results through IEEE Xplore.

Publications

IEEE ISPPC 2025	Super-Resolved Monkeypox Image Dataset for Enhanced Classification and Detection
IEEE Xplore	DDI Identification and Adverse Reaction Analysis using GNN and Sentiment Analysis
IJLRET Journal	Hybrid ARIMA-LSTM Forecasting of Ocean Acidification and Hypoxia
Independent Research	Langton’s Ant Algorithm for Secure Message Encoding

Research & Technical Skills

Programming & Data Engineering	Python, SQL, R, Pandas, NumPy, ETL Pipelines, Data Cleaning, Data Validation, Data Modelling, Feature Engineering
Artificial Intelligence	Machine Learning, Deep Learning, NLP, LLMs, Prompt Engineering, Generative AI, Graph Neural Networks, Predictive Analytics
Business Intelligence	Power BI, DAX, Power Query, Tableau, KPI Dashboards, Data Visualisation, Reporting Systems
Software Development	Flask, Streamlit, REST APIs, Git, Linux, PostgreSQL, MySQL, Database Design
Professional Skills	Stakeholder Engagement, Requirements Gathering, Technical Documentation, Problem Solving, Project Delivery
